

Peel Rivets

The Peel Rivet is a suitable option for joining soft materials such as wood, plastics and rubber. Rather than deforming the rivet body, the mandrel cuts the rivet body to form load spreading petals.

Material: Body: Aluminium 5056 (AlMg5)
Mandrel: Low Carbon Steel

Finish: Body: Bright Plain
Mandrel: Zinc Coated with Clear Passivation

Dimensions and specifications are subject to change without notice. Check your distributor for the latest data sheet. The test data provides approximate strength values averaged in multiple tests in various materials and thicknesses. We recommend testing your application when an exact strength figure is required, or the load to be applied comes close to the published data.
