

RIVTEC®

Rivtec® ZT3213

Air Riveting Tool for up to 9.5mm Ø

The Rivtec® ZT3213 tool is a cross-over model that combines 3/8-inch hydraulic cylinder components with 1/4-inch air-cylinder components. The resultant tool is very low-cost for its capability, has high traction power, but limited stroke (two cycles for 3/8-inch structural rivets). Intended users are low volume and intermittent installers of 3/8-inch rivets and 5/16-3/8 inch lock-bolts. Manufactured in Taiwan, the tool incorporates good design and build quality. Warranty is 12-months and is fully supported with spares and service as may be required.

Setting Capacity
